**Note for Instructors:** Review each question individually. If the learner calculated the hours worked incorrectly each day, use their incorrect numbers for the Total Hours worked (this is to see if they can add correctly, while the other is a time calculation). Also use the Total Hours they wrote down to check their answer on Total Pay (this is to see if they can multiply correctly). This is not a culminating task. Authentic tasks should not have their answers based on the correctness of a previous answer.
