

Task prepared for the project "Using Technology to Facilitate Connections between Literacy and the Broader Community" (2014)

## Task Title: The Great Canadian Road Trip - Part 4 - Costs

OALCF Cover Sheet - Practitioner Copy

Learner Name: $\qquad$

Date Started (m/d/yyyy): $\qquad$

Date Completed (m/d/yyyy): $\qquad$
Successful Completion: Yes $\square$ No $\square$
Goal Path:

Secondary School $\square$
Employment $\quad \square$

Task Description: Having chosen destinations, a route, and a schedule in parts 1, 2, and 3, learners will calculate the cost of their trip.

Competency: A: Find and Use Information
B: Communicate Ideas and Information
C: Understand and Use Numbers
D: Use Digital Technology
Task Groups: A1: Read continuous text
B3: Complete and create documents
C1: Manage money
D: N/A

## Level Indicators:

- A1.2: Read texts to locate and connect ideas and information
- B3.2a: Use layout to determine where to make entries in simple documents
- C1.2: Make low-level inferences to calculate costs and expenses that may include rates such as taxes and discounts
- D3: Experiment and problem-solve to perform multi-step digital tasks Performance Descriptors: See chart on the last page Materials Required:
- Learner information and task sheet
- Completed task sheets from Part 3
- Computer and access to the Internet
- Lined paper for calculations
- Calculator (optional)
- Pencil or pen

## Learner Information

Your road trip will cost money. It is good to know before leaving what the total cost is likely to be.

## Work Sheet

Task 1: For each city you will be staying in, use the Internet to find a place to stay. This could be a hotel, a campground, or a friend or family member's home. Use the chart below to record locations and costs.
Answer:

| City | Accommodations | Cost <br> per <br> Night | Total <br> Nights | Total <br> Cost |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  | Total Accommodation Cost |  |  |  |

Task 2: Assume that you can travel 500 km per full tank of gas. Look back to part 3 and find your total trip distance. Divide this number by 500. Take your answer and multiply it by the cost of filling your gas tank (if you don't currently have a car, assume this cost to be $\mathbf{\$ 6 0}$.)

Answer:
a) Total Trip Distance:
b) Divided by 500 :
c) Cost to fill your tank:
d) Total Fuel Cost for Trip (b x c):

Task 3: You will need food during your trip. Assume that on average, you will spend $\mathbf{\$ 5 0 . 0 0}$ per adult and $\mathbf{\$ 4 0 . 0 0}$ per child on each day of your trip.

Answer:
a) Number of adults:

b) Number of Children: $x \$ 40.00=$
c) Total Food Cost Per Day $(a+b)=$ $\qquad$
d) Total Food Cost (c x days) $=$ $\qquad$

Task 4: Calculate the total cost of your trip, including accommodation, food and fuel.

Answer:

## Performance Descriptors

| Levels | Performance Descriptors | Needs Work | Completes task with support from practitioner | Completes task independently |
| :---: | :---: | :---: | :---: | :---: |
| A1.2 | Scans text to locate information |  |  |  |
|  | Locates multiple pieces of information in simple texts |  |  |  |
|  | Makes low-level inferences |  |  |  |
|  | Reads more complex texts to locate a single piece of information | $\square$ |  |  |
|  | Begins to identify sources and evaluate information |  |  |  |
| B3.2a | Uses layout to determine where to make entries |  |  |  |
|  | Begins to make some inferences to decide what information is needed, where, and how to enter the information |  |  |  |
|  | Makes entries using a limited range of vocabulary |  |  |  |
| C1.2 | Calculates using numbers expressed as whole numbers, fractions, decimals, percentages, and integers |  |  |  |
|  | Interprets and applies rates (e.g. \$/kg, \$/1) |  | $\pm$ |  |
|  | Chooses and performs required operation(s); may make inferences to identify required operation(s) |  |  |  |
|  | Selects appropriate steps to reach solutions |  |  |  |

| Levels | Performance Descriptors | Needs <br> Work | Completes <br> task with <br> support <br> from <br> practitioner | Completes <br> task <br> independently |
| :--- | :--- | :--- | :---: | :---: |
|  | Represents costs and rates <br> using monetary symbols, <br> decimals, and percentages | $\square$ | $\square$ | $\square$ |
|  | Uses strategies to check <br> accuracy (e.g. estimating, <br> using a calculator, repeating <br> a calculation, using the <br> reverse) | $\square$ | $\square$ | $\square$ |
|  | Experiments and problem- <br> solves to achieve the <br> desired results | $\square$ | $\square$ | $\square$ |
|  | Manages unfamiliar <br> elements (e.g. vocabulary, <br> context, topic) to complete <br> tasks | $\square$ | $\square$ | $\square$ |
|  | Makes inferences to <br> interpret icons and text | $\square$ | $\square$ | $\square$ |
|  | Identifies sources, evaluates, <br> and integrates information | $\square$ | $\square$ | $\square$ |
|  | Performs advanced searches <br> (e.g. refines search terms, <br> uses advanced search <br> features, cross-refers <br> between websites) | $\square$ | $\square$ | $\square$ |

Task Title: TheGreatCanadianRoadTrip-Part4-Costs_I_A1.2_B3.2a_C1.2_D3

This task:
