OALCF Tasks for the Apprenticeship Goal Path: Prepared for the Project, Developing Best Practices for Increasing, Supporting and Retaining Apprentices in Northern Ontario (2014)

OALCF Task Cover Sheet
Task Title: Lasagna Portion Cost Card

| Learner Name: |  |
| :---: | :---: |
| Date Started: | Date Completed: |
| Successful Completion: Yes__ No |  |
| Goal Path: Employment__ Apprenticeship $\checkmark$ Secondary School__ Post Secondary ___ Independence_ |  |
| Task Description: <br> Use a costing card to calculate the cost of a recipe per serving. |  |
| Competency: <br> A: Find and Use Information <br> C: Understand and Use Numbers <br> D: Use Digital Technology | Task Group(s): <br> A2: Interpret documents <br> C1: Manage money <br> C3: Use measures <br> D: Use Digital Technology |

## Level Indicators:

A2.2: Interpret simple documents to locate and connect information
C1.2: Make low-level inferences to calculate costs and expenses that may include rates such as taxes and discounts.

C3.2: Use measures to make one-step calculations
D2: Perform well-defined, multi-step digital tasks

Performance Descriptors: see chart on last page
Materials Required:

- Pencil and paper
- Calculator - optional
- Computer with internet access
- Lasagna Cost Card - attached

Task Title: Lasagna Portion Cost Card
Cooks prepare catering budgets including expenses for the amount of food in different size containers. Look at the Lasagna Portion Cost Card.

## Learner Information and Tasks:

Task 1: The cook is preparing for a wedding that will have 300 guests. Rounding to the nearest pound, calculate how many pounds of ground beef the cook will require.

Task 2: Calculate the cost for garlic required to make 300 portions. Remember to calculate the cost based on whole cloves.

Task 3: Use the internet to locate a metric-to-imperial conversion calculator. Calculate how many litres (L) of tomato sauce are needed to make 300 portions. Round your answer to one decimal place.

|  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | TOTAL | 82.212 |

## OALCF Tasks for the Apprenticeship Goal Path: Prepared for the Project, Developing Best Practices for

 Increasing, Supporting and Retaining Apprentices in Northern Ontario (2014)Task Title: Lasagna Portion Cost Card

## Answer Key

## Task 1: 26 pounds

One possible solution:
The ratio is portions : pounds (lb)
70 portions : $6 \mathrm{lb}=300$ portions : ' $x$ ' lbs
Cross multiply
$70 \mathrm{x}=300 \times 6$
$70 x=1800$
Solve for ' $x$ ' by dividing each side by 70
$x=25.71$ (round up to nearest pound)
A second possible solution:
$300 / 70 \times 6 \mathrm{lbs}=25.71 \mathrm{lbs}$

Task 2: One possible solution
Calculate number of cloves of garlic needed
The ratio is portions: cloves
70 portions: 12 cloves $=300$ portions : ' $x$ cloves
Cross multiply
$70 \mathrm{x}=12 \times 300$
$70 x=3600$
Solve for ' $x$ ' by dividing each side by 70
$X=51.42$ (round up to 52 cloves)
Calculate cost
52 cloves x \$0.44 each = \$22.88
A second possible solution:
$300 / 70 \times 12=51.42=52 \times \$ 0.44=\$ 22.88$
Task 3: One possible solution: Calculate the number of ounces needed for 300 portions, then convert
The ratio is portions : ounces (oz.)
70 portions : $36 \mathrm{oz}=300$ portions : x
Cross multiply: $\quad 70 x=36 \times 300$

$$
70 x=10800
$$

OALCF Tasks for the Apprenticeship Goal Path: Prepared for the Project, Developing Best Practices for Increasing, Supporting and Retaining Apprentices in Northern Ontario (2014)

Solve for ' $x$ ' by dividing each side by 70: $\quad X=154.28$ (round up to 155 oz .)
Convert ounces to litres using the internet
Open the internet
Use a search engine, such as Google, and search "litres to ounces calculator"
The formula for calculating ounces (oz.) to litres is:
1 oz . $=0.0296 \mathrm{~L}$
155 oz. X $0.0296=4.588$ litres (Round up to 4.6 litres as required)

A second solution: Convert ounces to litres, then calculate.
$36 \times .0296=1.0656 \mathrm{~L}$
70 portions : $1.0656 \mathrm{~L}=300$ portions : xL
Cross multiply: $\quad 70 x=300 * 1.656$

$$
\begin{aligned}
& x=319.68 / 70 \\
& x=4.566(\text { round to } 4.6 \mathrm{~L})
\end{aligned}
$$

OALCF Tasks for the Apprenticeship Goal Path: Prepared for the Project, Developing Best Practices for Increasing, Supporting and Retaining Apprentices in Northern Ontario (2014)

Task Title: Lasagna Portion Cost Card

| Performance Descriptors |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| A2.2 | - performs limited searches using one or two search criteria |  |  |  |
|  | - extracts information from tables and forms |  |  |  |
|  | - uses layout to locate information |  |  |  |
|  | - makes connections between parts of documents |  |  |  |
|  | - makes low-level inferences |  |  |  |
| C1.2 | - calculates using numbers expressed as whole numbers, fractions, decimals, percentages and integers |  |  |  |
|  | - chooses and performs required operation(s); may make inferences to identify required operation(s) |  |  |  |
|  | - selects appropriate steps to reach solutions |  |  |  |
|  | - represents costs and rates using monetary symbols, decimals and percentages |  |  |  |
|  | - interprets, represents and converts amounts using whole numbers, decimals, percentages, ratios and simple, common fractions (e.g. $1 / 2,1 / 4$ ) |  |  |  |
|  | - uses strategies to check accuracy (e.g. estimating, using a calculator, repeating a calculation, using the reverse operation) |  |  |  |
| C3.2 | - calculates using numbers expressed as whole numbers, fractions, decimals, percentages and integers |  |  |  |
|  | - understands and uses ratio and proportion |  |  |  |
|  | - converts units of measurement within the same system and between systems |  |  |  |
|  | - chooses and performs required operation(s); may make inferences to identify required operation(s) |  |  |  |

OALCF Tasks for the Apprenticeship Goal Path: Prepared for the Project, Developing Best Practices for Increasing, Supporting and Retaining Apprentices in Northern Ontario (2014)
$\left.\begin{array}{|l|ll|l|l|l|}\hline & \bullet \text { selects appropriate steps to solutions } & & & \\ \hline & \bullet \text { interprets, represents and converts measures using whole } \\ \text { numbers, decimals, percentages, ratios and simple, common } \\ \text { fractions (e.g. } 1 / 2,1 / 4)\end{array}\right)$

This task: was successfully completed $\qquad$ needs to be tried again
